HOOK, JAMES F

ART UNIT

PAPER NUMBER

3754

DATE MAILED: 05/22/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

SP

Office Action Summary	Application No. 10/521,400	Applicant(s) ESTEFEN ET AL.	
	Examiner James F. Hook	Art Unit 3754	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 January 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-8 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 6, and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Obeshaw (468). The reference to Obeshaw discloses the recited sandwich pipeline where the recitation of for “ultra deep waters” is considered to be in the preamble and breathes no life into the body of the claim as well as being merely intended use where the pipe of Obeshaw is capable of use in deep waters in that it is of the same structure, comprising an internal layer 10 and external layer 8 can both be formed of metal such as carbon steel or stainless steel, and has an intermediate layer 6 can be formed of various materials including foams and is meant to provide structural strength and being

Art Unit: 3754

made of insulating materials is considered low in thermal conductivity, where polypropylene can be used to form the intermediate layer.

Claims 1, 3, 5, and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Motsenbocker, Jr. The patent to Motsenbocker, Jr. discloses the recited sandwich pipeline where the recitation of for "ultra deep waters" is considered to be in the preamble and breathes no life into the body of the claim as well as being merely intended use where the pipe of Motsenbocker, Jr. is capable of use in deep waters in that it is of the same structure, comprising an internal layer 6 of stainless steel and external layer 11 made of carbon steel, and has an intermediate layer 12 can be formed of cement material such as concrete which contains cement where the layer is provided for strength and being made of insulating material is considered low in thermal conductivity.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Motsenbocker, Jr. in view of Obeshaw (468). The patent to Motsenbocker, Jr. discloses all of the recited structure with the exception of forming the inner layer of carbon steel. It would have been obvious to one skilled in the art to modify the inner layer of

Art Unit: 3754

Motsenbocker, Jr. to be formed of carbon steel instead of stainless steel as such is an equivalent material used for the inner layer of a pipe in place of stainless steel as suggested by Obeshaw where such would lessen the cost by removing the need to use an expensive steel such as stainless steel thereby saving money.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Motsenbocker, Jr. in view of Sumner. The patent to Motsenbocker, Jr. discloses all of the recited structure with the exception of forming the intermediate layer of polypropylene. The patent to Sumner discloses that it is old and well known in the art to form intermediate layers of pipes with inner and outer metal pipes with of various materials including cements and polypropylene. It would have been obvious to one skilled in the art to modify the intermediate layer of Motsenbocker, Jr. by forming such of polypropylene instead of cement where such is an equivalent material used as an intermediate layer between metal pipes as suggested by Sumner and would provide for a lighter pipe that would be easier to install and thereby save installation costs.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Motsenbocker, Jr. in view of Obeshaw (468) as applied to claims 2 and 7 above, and further in view of Sumner. The patent to Motsenbocker, Jr. as modified discloses all of the recited structure with the exception of forming the intermediate layer of polypropylene. The patent to Sumner discloses that it is old and well known in the art to form intermediate layers of pipes with inner and outer metal pipes with of various materials including cements and polypropylene. It would have been obvious to one skilled in the art to modify the intermediate layer of Motsenbocker, Jr. as modified by

Art Unit: 3754

forming such of polypropylene instead of cement where such is an equivalent material used as an intermediate layer between metal pipes as suggested by Sumner and would provide for a lighter pipe that would be easier to install and thereby save installation costs.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references to Reece, McKay, Fruck, van Hatten, Everett, Schippl, Obeshaw (110), Giovannini, and Manini disclosing state of the art sandwich pipes.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James F. Hook whose telephone number is (571) 272-4903. The examiner can normally be reached on Monday to Wednesday, work at home Thursdays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Shaver can be reached on (571) 272-4720. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
